

Backshells and Accessories for Circular Connectors according to MIL- and VG-Specifications

The new EMCA Hybrid- Surface Finish is ROHS-and REACH-compatible. It was developed as an alternative for Cd-olive drab-, ZnNi-, ZnCo-, Ni-PTFE- and Ni- finishes. It is intermatable with those and other finishes of the corresponding connectors, without interfering their features.

Goodbye – Surface Finish Variety

Goodbye – Cadmium and Chromium VI

The Shielding effectiveness- and salt spray resistance- have been tested successfully and the items are approved by VG 95319-1011.

Our Hybrid-Surface Finish is available for backshells and accessories of all series.

Data sheets including the Hybrid-finish items are available for our customers upon request.

Backshell-Assemblies and Protective Covers after the VG-Corrosion Test (Salt Spray and Damp Heat)
